

ENVIRONMENT — SOCIAL — GOVERNANCE

Our People

Our Values:

Take responsibility for personal safety and the safety of others and accept as a condition of employment safe work performance, safe behavior, and compliance with health and safety rules.

Commit to improving our compliance culture and take responsibility for seeing that our policies, procedures, and programs are followed, thereby ensuring full regulatory compliance.

Have "Safety First" be a personal objective and not just a corporate slogan. We ask our employees to commit to our goal of "ZERO INCIDENTS."

Recognize that no job is so urgent that it requires compromising our health and safety values and agree to immediately stop any operation or task that is unsafe or creates a potential environmental risk.

Uphold management's commitment to providing the necessary resources and support for the company's health and safety and compliance culture initiatives.

Our Strategic Objectives

GUIDING PRINCIPLES

Governance and Transparency Buckeye promotes the highest standards of corporate governance by ensuring we have responsible policies, processes, procedures, and guidelines, including a forward-leaning management system, to foster and reinforce business practices that adequately manage all material risks and are consistently sound, highly principled, and transparent.

Workforce Empowerment Buckeye strives to employ a diverse and inclusive workforce. We will maintain a supportive and developmental work environment to foster the growth of our existing employees and to prepare the next generation of Buckeye leaders.

Health and Safety At Buckeye, health and safety are fundamental core values to our business. We are focused on integrating industry-leading programs and processes to prevent and mitigate incidents and ensure the health and wellness of our employees, contractors, and the communities in which we operate.

Environmental Stewardship Buckeye will continually strive to minimize the environmental and climate-related risks associated with our operations consistent with industry best practices. We will identify and implement reasonable energy, water, and waste conservation practices and materials innovation to reduce our impact on the environment. We commit to reducing greenhouse gas emissions, limiting air pollution, and managing hazardous substances that could be harmful to local populations. Furthermore, Buckeye will also promote actions that protect local habitats and the biodiversity of the regions in which we have an impact.

Economic and Social Development Buckeye closely monitors our operations across the communities in which we operate and works to develop and maintain positive relationships aimed at creating sustained stakeholder value. In collaboration with our community partners, we identify opportunities where our efforts or contributions can have a meaningful local impact.

Environment

Advancing Cleaner Energy Alternatives

Buckeye is committed to expanding solar initiatives through both organic growth and investment in new solar projects. We are actively developing organic solar projects with approximately 630 MW of solar power across Pennsylvania, New Jersey, New York, Texas, and the Bahamas. These projects are expected to generate over 1 terawatt of renewable power, which is enough to provide power to approximately 100,000 households annually. To further expand renewable power infrastructure, Buckeye invested in Swift Current Energy, a solar and wind developer with a 2+ GW pipeline of projects under development.

Additionally, in 2021, Buckeye invested in OneH2, a provider of hydrogen-based fuel, as well as advanced a number of biofuels infrastructure projects in New York Harbor and across multiple terminals in New York and Connecticut.

Variable Frequency Drives

Reduced potential energy consumption by ~44,000,000 kWh annually, or the equivalent benefits of:

Drag Reducing Agent

Drag Reducing Agent skids installed at points in the pipeline system reduce potential electric consumption by ~71,000,000 kWh annually or the equivalent benefits of:

Waste Minimization

Buckeye works to reduce waste generated and limit waste to landfills in an effort to conserve resources. We believe that "Every Little Bit Counts," and that is reflected through our approach to waste management. We continue to monitor effective ways to reduce our waste throughout our operation.

Since January 2021, 259 locations have recycled 25,689 ton(s) of recyclable materials.

These recycling efforts conserved the following resources:

3,158 Mature Trees were Saved

Representing enough saved timber resources to produce 39.13M sheets of newspaper!

1,784 Cubic Yards of Landfill Airspace

Representing enough airspace to fulfill the disposal needs for 2.29k people for one year!

42,300,578 Kw-Hrs of Electricity

Enough power to fulfill the annual electricity needs of 3.53k homes!

Avoided 14,426 Metric Tons (M2CO2E) of GHG Emissions

Your recycling has prevented these emissions!

1,874,884 Gallons of Water

Representing enough fresh water to meet the needs of 25.0k people!

Vapor Recovery Units

In 2021, the use of VRUs for gasoline truck loading across Buckeye's enterprise saved roughly 126,000 tons of CO2 emissions.

Damage Prevention

Design Encroachment Reviews: Buckeye conducted 721 encroachment control reviews in 2021.

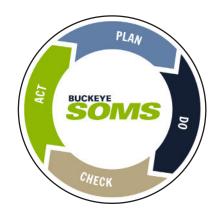

Aerial Patrol: The Aerial Patrol Program inspected 261,081 miles of pipeline right of way and reported 3,314 potential encroachments or adverse ground conditions for subsequent Field Operations response and resolution.

Vegetation Management: In 2021, the Right-of-Way Vegetation Management Program was applied to 758 miles of pipeline right-of-way.

Health and Safety

Safety and Operations Management System (SOMS):

Our Safety and Operations Management System (SOMS) provides a structured and integrated framework to manage risk across the business. It allows us to achieve our business objectives without harming people, property, the environment, our customers' products, or the company's reputation. This system allows for two-way communication, ensures we are operating effectively and safely, certifies we are qualified and trained, and emphasizes employee engagement. The ten elements of the SOMS Framework, shown in the outer ring of the figure below, reinforce our values and Business Operating Model. The Plan-Do-Check-Act cycle is at the center of our management system. Using this iterative process, we continuously improve both our overall performance and our compliance processes throughout the asset life cycle.

Diversity, Equity, and Inclusion

Fostering Diversity

Buckeye is committed to cultivating a diverse and inclusive workplace. Our organization encourages and practices transparent communication and different points of view. We are committed to enhancing the diversity of our workforce at every level of our organization and support this through our policies, practices, and systems.

Our actions to support our diversity and inclusion commitment are focused on four key areas:

- | Governance and Management
- Compliance and Foundational Activities
- Metrics, Evaluation and Accountability
- Change Management and Communication

Buckeye's talent acquisition strategy focuses on sourcing and recruiting qualified diverse candidates. Our talent acquisition team partners with various agencies and outreach organizations to support our recruitment efforts.

Buckeye conducts an ongoing review of its compensation and benefits plans. Our review of pay between gender, age, and race is conducted and any disparities are reviewed to ensure fair and equitable compensation practices across the organization.

We also have an employee-led Women's Group founded to provide opportunities for individuals to develop professional leadership skills as well as nurture personal and intellectual growth, which ultimately contributes to Buckeye's success.

Public Awareness Program

Buckeye engages with our communities through periodic in-person interactions and targeted mailings under its Public Awareness Program. The objective is to communicate the efforts our industry undertakes to help protect their safety, particularly as it relates to information about the transportation of petroleum products and natural gas.

Live Meetings

Work-Life Balance

At Buckeye, we believe that maintaining a healthy work-life balance helps reduce stress, improve mindfulness and productivity, and support employee engagement in the workplace. The health and wellbeing of our employees, both physically and mentally, is a top priority. In support of our employees finding time throughout the year to volunteer in their community or to attend an important event for a family member, Buckeye provides community service and family days as part of their employee benefits package. This accounts for almost 50,000 hours across our employee base in addition to their vacation time benefits.

Governance

Buckeye is wholly owned by our shareholder, IFM. Buckeye's leadership team provides oversight for the overarching ESG strategy which aligns to IFM's goals, including compliance, business ethics, and professional conduct. Our Board of Directors brings their diverse perspectives and skill sets to provide thoughtful leadership.
